

Energy Essentials for Cost Reduction: Demystifying Energy and Carbon Markets

Hearing from international energy experts this half day conference and workshop focusses on how energy costs can be reduced by improving our understanding the energy and carbon markets. These markets form basis for the range of products available from energy suppliers and by breaking down the fundamentals, we will look at how to make these work for your business.

Arrival (08.10) and Welcome (08.30)

Introductions and conference objectives

Gary Sims, Fathom Energy & Environment

Gas, Electricity and Carbon Costs (08.45)

How your energy bills are made up. Looking at what is negotiable and what is not
